## WHO WE ARE

DTN INTEGRATED SERVICES LIMITED is a leading provider of advanced engineering and procurement services to the exploration and production companies in the oil and gas industry. DTN is fully Nigerian owned with specialized, technical and unrivalled expertise in providing world class solutions.

Founded in 2009, DTN Integrated Services Limited has been on a fast path of growth and development with highly skilled and technically capable manpower with strong belief and passion in the philosophy of delivering projects safely, on schedule and within budget maintaining international standards using leading technology.

DTN has gained an excellent reputation for providing a responsive, client-centered approach combined with expertise and innovative products in the industry. Therefore, as a dependable company, we do not compromise standards as we are committed to meeting all requirements associated with our operations and exceeding client's expectations in the quality of our service delivery.

DTN has invested in procurement of brand new specialty equipment and has continued on the acquisition of more assets to bring together the facilities that enable her offer international quality services and a number of sustainable and innovative new technologies.

## OUR VISION

To be a house-hold name that provides world class Engineering and Procurement Services to the Oil and Gas Industry in Nigeria and beyond.

## OUR MISSION

To consistently create value for our clients by providing technical solutions that improves efficiency whilst ensuring safety, environmental protection and local participation.

## CORE VALUES

**Safety** – We have a track of impeccable record when it comes to safety as every member of DTN is committed to an incident free work place, everyday, everywhere.

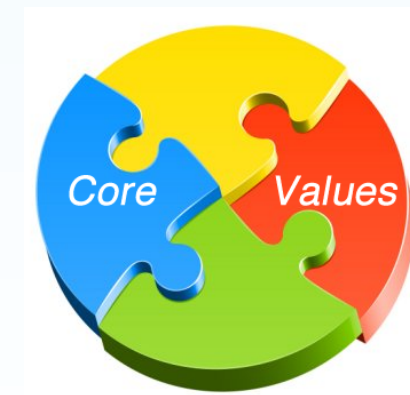

**Honesty** – we are trust worthy, loyal, fair, and sincere in all our dealings. We can be trusted as this reflects on our clients' feedback

**Integrity** - We observe the highest ethical standards in the conduct of our operations and that has earned us so much trust and respect.

**Enthusiasm** – Every DTN personnel is passionate in what we do which has been a driving force

**Operational Excellence** - We strive for excellence in everything we do in order to achieve superior business results that is why we set the highest standards and autograph our operations with excellence.

**Innovation** - We utilize latest technology to offersolutions that meet clients' needs

## OUR METHOD

We execute our services in the most efficient, effective and reliable way that ensure we solve clients' challenges, which is second only to keeping everyone safe and healthy while providing considerable return on investments.

## OUR COMMITMENT

To provide standard products and services in the safest and environmentally friendly way that exceeds our client's expectations using advanced technology.

## WHAT WE DO

- Corrosion Control and Monitoring Services
- Valve Maintenance and Repairs
- Scaffolding Services
- Non-Destructive Testing (NDT)
- Construction/Fabrication/Sectional Replacement
- Chemical Injection
- Pipeline Laying and Construction
- Procurement and Supply Chain Management
- Logistic Services
- Pipeline integrity Management

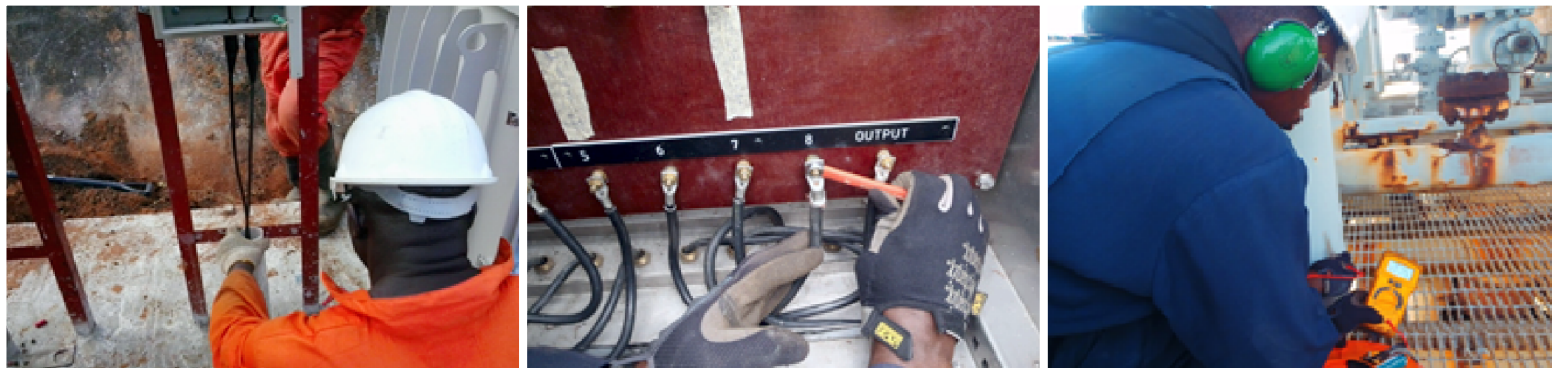

## CORROSION PREVENTION AND MONITORING

DTN Integrated Services Limited specializes in delivering corrosion prevention and cathodic protection engineering and technical services. Our team members have extensive hands-on experience with designing, procuring, installing, manufacturing and maintaining cathodic protections (CP) systems. In partnership with Integrated Corrosion Company we solve any CP problem and design a relevant solution that will prevent corrosion and protect your infrastructure.

We provide everything your company needs in cathodic protection and project management during the life cycle of your project.

In partnership with our technical partner (Integrated Corrosion Company – World leader in corrosion solution) we manufacture project specific Cathodic Protection rectifiers, junction boxes, test stations, anodes and equipment of the highest quality.

We equally provide simplified, straightforward corrosion prevention solutions for existing offshore and marine structures. DTN/ICC are able to offer an array of galvanic and impressed current options that will one day become the standard for the multitude of corrosion issues experienced in today's marine environments.

## VALVE MAINTENANCE, REPAIRS AND PROCUREMENT

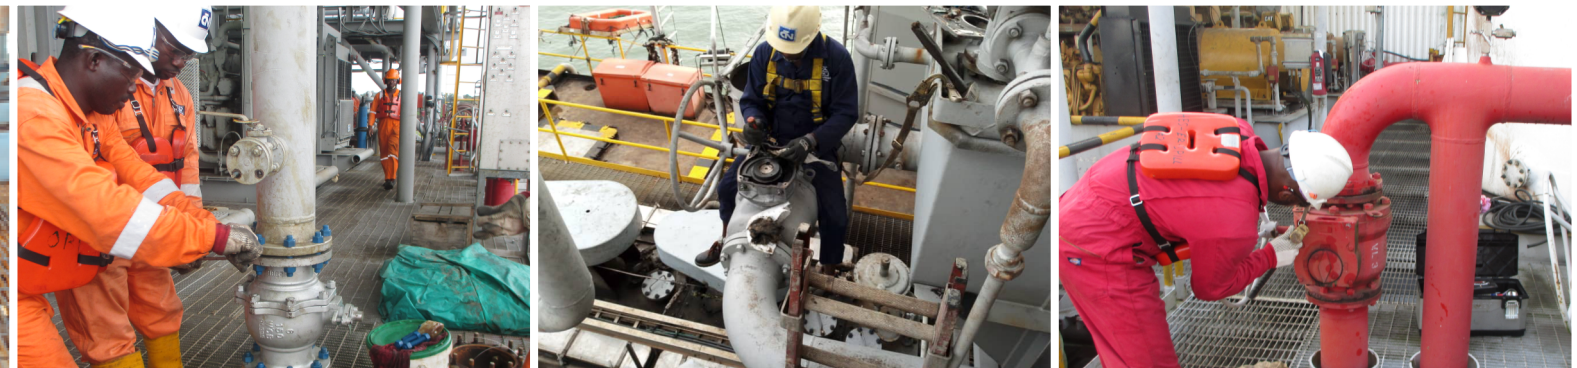

DTN Integrated services Ltd help clients to procure, deploy and manage their Valves within their supply chain.

Our services are underpinned by our proprietary OMEs which enables organizations to deploy the best Valves and reduce the risk across processes through our highly skilled Engineers.

Quality Valves is an essential tool for all oil and gas companies wishing to efficiently and consistently manage all flow processes. Through the knowledge gained from our support services, clients will fully understand the whole processes to proactively manage and mitigate all risk within the flow processes.

We procure and supply Ball Valves, Globe Valves, Gate Valves, Check Valves, Butterfly Valves, Plug Valves, Instrument (Block and Bleed) Valves etc of class 150#-2500# API 3000-15000, material trim of Carbon Steel (CS) Stainless Steel (SS), Duplex Stainless Steel (DSS), operators of lever, gear box or Actuator (Motorized).

DTN equally do barrel door installation and maintenance with cutting edge technology and a bunch of technology.

## SCAFFOLDING SERVICES

DTN team of scaffolders are not only highly skilled and meticulous, but also professional in their conduct at all times. We offer a wide range of scaffolding accessories (Jacks, ladders, clips, boards, swivel coupler, double coupler, tubes, Clamps, cuplocks, gates etc ) for virtually any application and believe in giving each and every customer the very highest level of safety and customer care whilst keeping our rates amongst the most competitive in the industry. Our Products are tested and conforms with the requirement of **BS EN39:2001**

Our scaffolding Services ranges from:

- Chimney Scaffold
- Access Platforms
- Construction Scaffolding
- Scaffolding Erectors and
- Independent Scaffolding

## NON-DESTRUCTIVE TESTING (NDT)

DTN in partnership with **Nucleom** is best known for developing and executing the most effective NDT methods, techniques and strategies to most effectively solve the needs of our clients across oil and gas industry. DTN/Nucleom takes great pride in its high-level expertise, cutting edge equipment and impressive R&D programs involved in providing our clients with an inspection they can feel comfortable with and results that count.

We particularly specialize in advanced applications such as complex geometries and Corrosion Resistant Alloys (CRA) inspections.

Our range of services includes:

- **Ultrasound**
  - ~ Phased Array Ultrasonic Testing (PAUT)
  - ~ Automated Ultrasonic Testing (AUT)
  - ~ Guided Wave (GW)
- **Eddy Current**
  - ~ Conventional electromagnetic testing
  - ~ Eddy Current Array (ECA)
  - ~ Tangential Eddy Current (TEC)
- **Radiography**
  - ~ Computed Radiography (CR)
  - ~ Small Control Area Radiography (SCAR)
  - ~ Direct Radiography (DR)
- **Tubing**
  - ~ Magnetic Flux Leakage (MFL)
  - ~ Eddy Current Testing (ECT)
  - ~ Internal Rotary Inspection System (IRIS)
- **Traditional NDT**
  - ~ Liquid Penetrant Testing (PT)
  - ~ Leak Testing (LT)
  - ~ Magnetic Flux Leakage (MFL)
  - ~ Magnetic Particle Testing (MT)
  - ~ Visual

## CONSTRUCTION/FABRICATION/SECTIONAL REPLACEMENT

DTN Integrated Services Limited, with a workforce of highly skilled and experienced personnel, has the capacity to undertake major projects and constructions to the oil and gas industry in Nigeria, ranging from sectional replacement, surface and underground tank fabrication and installation.

Our long-standing presence in Port Harcourt as well as our enhanced capability enables us to operate in critical, sparse and hostile environments.

## CHEMICAL INJECTION

DTN specializes in the application, design and manufacture of transportable, permanent and skid-mounted chemical injection systems.

These systems can be of standard design or built to customer bespoke requirements to deliver the full range of production chemicals. Our chemical injection pump units range from a single pump application to multiple pneumatic injection pumps with discharge flow rates of 0 to 2500 litres/hour and pressures from 0 to 13,000 psi.

The pumps are constructed from stainless steel which can be trimmed for various applications. We also design containerized flow improver systems for extreme environmental conditions. These units are fully insulated and contain chemical storage tanks allowing the units to function for longer periods of time without the need for logistical support.

We offer:

- Single-Point Chemical Injection Systems
- Multi-Point Chemical Injection Systems
- Solar-Powered Chemical Injection Systems
- Gas-Powered Chemical Injection Systems
- Chemical Injection Systems for Extreme Environmental Applications
- Chemical Distribution Panels/IRCD
- Chemical Pump Skids/Containerized Pump Skids
- Barrel Handling
- Fuel Transfer Pumps
- Equipment Hire
- Specialist Drag Reducer Injection Systems

## PIPELINE LAYING AND CONSTRUCTION

With a large, modern and specialized construction equipment fleet, DTN has a strong record of pipes laid in Nigeria under the most difficult environmental and logistical conditions, such as mountains, forests, jungles, and swamps.

We apply the highest standards of safety and quality with the latest technology and techniques in pipeline construction

DTN's highly skilled service engineers specialize in the installation and configuration of chemical injection systems in-line with our clients' exact specifications and application of use.

## PROCUREMENT AND SUPPLY CHAIN MANAGEMENT

DTN has strategic access to manufacturers in Europe, Asia and America to supplement the local capacity available within Nigeria. This market access is made possible by the use of world class buying houses and our ability to leverage on our relationship with our technical partners to obtain value for our clients.

We are able to offer a range of solutions from complex integrated project procurement to everyday routine operational procurement. Scale is not a concern as we have the capabilities to meet the challenges of today's mega projects.

We continue to develop our relationships with manufacturers in the provision of specialist items including pipes, valves, fittings, scaffolds, chemicals, safety equipment, flanges product range etc.

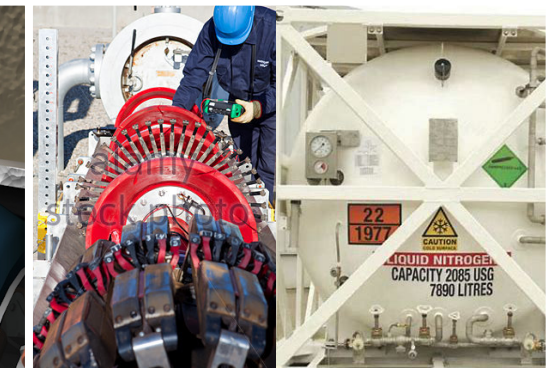

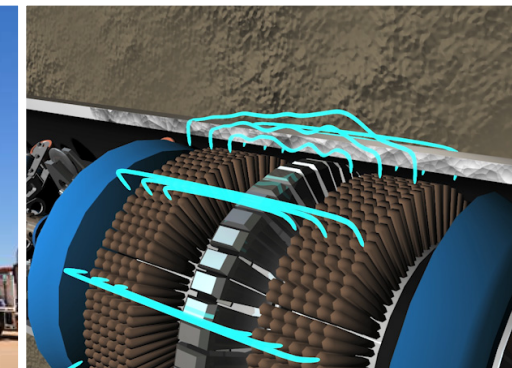

## LOGISTICS

Within a period of ten years, we have assisted our clients in managing the logistics requirements of high value projects throughout the life cycle of the project. Our specialization includes the transportation of construction structures, modular buildings, vehicles and vessels.

Our team offer:

- guidance on customs clearance regulations
- insurance, shipping and security solutions
- storage services and warehousing
- supply chain management
- material handling
- safe and secure e-transportation modes
  - ❖ Air
  - ❖ Ship
  - ❖ Road

## PIPELINE INTEGRITY MANAGEMENT

Unlike manual methods of test and measurement, **DTN** in partnership with **PIP360** provides a fully self-contained, permanently mounted Pipeline Wall Thickness Measurement System. The system installs virtually anywhere in your pipeline infrastructure at as many locations as you require providing **real time Integrity Assessment of Pipeline/Facility**.

DTN also provides the following Pipeline Services.

- Hydro Testing
- Nitrogen/Helium Services
- High Pressure, High-Volume Pumping
- Dewatering
- Commissioning
- Drying
- Inerting
- Baseline Survey
- Pipeline Real Time Integrity Assessment Monitoring Using Pipe360

## **NIGERIAN CONTENT DEVELOPMENT (NCD) POLICY**

Nigerian Content is defined as the quantum of composite value added or created in the Nigerian economy through the utilization of Nigerian Human and material resources for the provision of goods and services to the petroleum industry within the acceptable quality, health, safety and environment standards in order to stimulate the development of indigenous capabilities.

The Nigerian Content Development Strategy seeks to promote a framework that guarantees active participation of Nigerian in oil and gas activities without compromising standards as well as focusing on the promotion of value addition in Nigeria through the utilization of local raw materials, products and services in order to stimulate growth of indigenous capacity.

In line with the Federal Government's Policy to encourage and facilitate the development of the competencies, capacities and competitiveness of indigenous contractors and their employees, DTN INTEGRATED SERVICES LIMITED and her technical partners will implement this goal in the execution of all her projects.

DTN INTEGRATED SERVICES LIMITED as an indigenous service company is involved in a wide range of services in the oil and gas industry from pipeline corrosion control services to engineering services and general procurement.

Our strategic alliance with our foreign technical partners has not undermined the ideal of the Nigerian Content Development policy of the Federal Government of Nigeria in anyway.

Managing Director

Engr. DOZIE OBI

## **SAFETY FIRST**

### **HSE & Service Quality**

We take our safety and the safety of others very seriously, this shows our commitment as to why we start every meeting with a safety moment and also conduct operations that are safe and environmentally responsible.

DTN INTEGRATED SERVICES LIMITED believes safety is a concern for all. That is why every person at every location makes safety awareness their number one priority. Every member of DTN team is tasked with taking personal ownership of his or her own safety and the safety of others.

Our goal is to keep our people and the environment in which they work, safe and healthy. To this end, we put policies and procedures in place to make sure that adherence to proper safety practice are a total commitment on the part of everyone.

At DTN, we keep a repository of safety materials for our stakeholders and anyone who visits us. These safety messages are numerous, diverse and covers topics such as fatigue, malaria prevention, water contamination, ladder safety and heat exhaustion. As a foundational element of our Journey to zero tolerance, we educate our people on some Life Rules. The Life Rules are a set of 10 core factors that affects personal safety. They are based on our HSE standards and are a powerful tool to communicate critical requirements to our employees. Every employee is required to learn all 10, to use them every day, and to make them a regular part of our safety dialogue. The Life Rules are:

- Driving Safety
- Confined Space
- PPE
- Lock-Out Tag-Out
- Dropped Objects
- Hand Tools
- Working at Heights
- Lifting and Hoisting
- Work Permits
- Chemical Handling

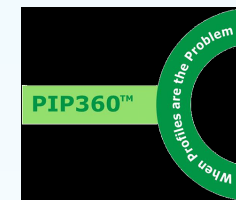

## OUR CLIENTS

We work closely with our clients to maintain a cordial and strong relationship to create a win-win situation. Currently our major clients are:
